SUMMARY

Passionate and highly motivated software developer with a strong commitment to continuous learning and staying up-to-date with the latest industry trends and technologies. Adept at leveraging cutting-edge tools and methodologies to deliver innovative solutions and drive impactful results.

EXPERIENCES

Software Engineer Feb 2024-Present

Digikala • Full-time • Hybrid

Optimize financial systems to enhance accuracy and efficiency in a high-transaction environment, ensuring reliable financial operations. Implement automation to streamline financial workflows, significantly reducing manual errors and improving process efficiency. Collaborate closely with cross-functional teams to integrate financial components into diverse projects, facilitating seamless execution and supporting comprehensive financial management across the organization.

Question Designer / Bootcamp Mentor (Golang) Jul 2023-Feb 2024

Quera • Part-time • Remote

Collaborate in designing exercises for the bootcamp, provide guidance to students in their Go programming journey, and assist with learning the language and its best practices. Work with Quera College to create and refine educational content, and participate in beta testing of courses and contests, offering feedback for improvement.

Software Engineering Internship

Apr 2023-Jul 2023

Quera • Remote

Completed a rigorous 4-month Go-focused bootcamp with extensive hands-on exercises. Worked with concurrency, GORM, SQL, Git, Docker, Microservices, Testing and Echo Web Framework. Actively contributed to team projects, demonstrating practical skills and effective teamwork. Enhanced abilities through beta testing for Quera programming contest.
